- Company Description:** Construction Resources Inc. is a fully independent third party design firm that consults on exterior building components for commercial properties.
At Construction Resources Inc. we design and manage exterior building restoration projects for the following building components: roofing, masonry, windows & doors, and below grade waterproofing.
- Job Description:** At Construction Resources Inc. you will be given the opportunity to learn and be involved with on site project management, of commercial and governmental real-estate exterior building restoration projects. As a Field Observer you will be onsite, monitoring contractor activity for construction document compliance and quality assurance. Must be detail oriented.
- Miscellaneous Info:** Prefer someone with engineering, construction, or construction management courses/degree/background, but not necessary. This position will be at least 8 hours daily. Please call or email for further information.
This position is a paid Internship/Co-op position or Summer Job. Positions typically start beginning of June and end approximately mid August.
